

What are Cookies?

Cookies are small text files (generally filled with letters and numbers) which the majority of web sites store on your computer or handheld device. These cookies are harmless and cannot cause damage to your computer. Cookies are regularly used to ensure that websites function correctly.

Without cookies, website features such as shopping baskets and members' areas could not work as they do now. Cookies are generally beneficial, making your interaction with websites smoother and much easier.

How we use Cookies

We may use cookies to keep track of what you have in your basket, to keep you logged into a members' area, to suggest products you might be interested in while you visit, to remember currency and/or language choices you have made, or to remember you when you come back to our site (for example). We do not store any personal information in these cookies at all, not even in an encrypted form.

Some cookies may also be set by third parties (such as Google) for statistics and to help us improve the services and products we provide to you. None of these cookies collect personal information that would allow anyone to identify individual users of our site.

By using our site you give us consent to store cookies on your computer. If you do not wish to consent then you must either disable cookies in your browser/handheld device or refrain from using our site.
